2979-908 Sesimbra
Portugal

Picasso has always been exclusively dedicated to spearfishing products, since its creation in 1986. The high quality, durability and innovations of the products, made Picasso the most awarded brand in the world and European Championships of the last two decades! Champions like Jose Amengual, Pedro Carbonell, Jose Viña, Alberto March and Rui Torres, were all 'born' with Picasso equipment. Picasso is now managed by Carlos Osório, also World and European Team Champion, who will transmit all his experience to the continued research of the best equipment a spearfisherman can find... and only Picasso can offer! When you think of Spearfishing equipment, you will always think of Picasso!

Carlos Osório

About the photographer

Rui Guerra was born in Lisbon in 1968 and soon become connected to the sea, where he tries to find his interior balance and inner peace. As a natural consequence of many family moments spent at the coastline, he discovers the passion for the underwater world, which leads him to begin free diving and latter, scuba diving.

Photography became a part of his life almost by chance and, at the beginning was nothing more than "showing to other what he sees underwater". Maintaining a constant evolution at all levels and deepening his knowledge, he starts to broad his photographic horizons to other worlds, but he kept the underwater photography as the core of his activity.

Along his career, at both leisure and professional level, he has won several national and international competitions (vice-world champion, five times national champion).

CMAS** Underwater Photography Instructor, with several published articles, image and marketing consultant of Picasso, he is also the author of "Practical Underwater Photography Manual" (only available in portuguese).
